leadership, the experience of deeper comradeship, the consideration of the needs of others — are of great value. The presence in the school of a boarding community is thus something for which I am profoundly thankful, and I look forward eagerly to the time when we shall be able to offer boarding experience to girls also.

We have therefore, now and in succeeding years, a tremendous opportunity to create a school that will serve its community well. Let us not therefore be faint-hearted, or resentful of change; instead let us

'Look back with gratitude,  
Look forward with hope,  
Look up with confidence'.

### THE RAVEN

The slim, sharp bows of 'The Raven' cut through the water throwing aside two slices of white foam which raced past the black hull to join the long, straight wake that sparkled in the early morning sunlight.

The wind lifted a wave here and there, slapping it against the boat's side with a sharp thud, before rushing off to tease the white specks of foam that mottled the deep blue of the ocean. She was beginning to lean on the water now, her cream sails stiff and full with the wind, her blocks creaking under the strain.

An old man stood at the huge brass wheel, bracing himself against the breeze. His cap was pulled down over his ears, and his gnarled fingers handled the wheel with experienced ease, goading his love in front of the wind.

His teeth were clamped to a tarry, smouldering pipe, and on his ancient face was a secret smile as he watched a lone seagull resting on the breeze. He remembered how he had sailed that route two hundred years before, when 'The Raven' had been blown against the Needles, in 1775.

### THE SEX LIVES OF CORNFLAKES

The SEX LIVES of Cornflakes are very simple ones. The Male approaches the Female, and, they walk side by side, to the sexy place, which is, at, the bottom of the Kellogs Cornflake packet. When they get to the bottom of the packet, the Male, breaks the Female, into small peices, these small peices are the babys, that is why there is so many small peices at the bottom of the packet. That is because the bottom of the packet is the breeding ground.

ANDREW DAKIN, 1st Year J.D.
